Black Churches Leading with Solar: Incentives, Financing, and Stewardship

With the federal government paying for at least 30% of the cost of solar installation, if not 40 to 50%, many congregations that own their own building can no longer afford to not go solar. In this webinar, we will focus on Black churches leading with solar. We will hear experts discuss everything one needs to know about government incentives and solar financing. Even if you can't make the webinar at 1 pm ET on Wednesday, May 29th, still register, and we will send you a link to the recording afterward. [Register now!](#)
